

Aditya Sriram Mattaparthi

Software Principal Engineer @ Dell Technologies

aditya.cr381v@gmail.com · +91 99000 49548 · Greater Bengaluru · www.linkedin.com/in/adityasriram-mattaparthi/

Summary

With over 16+ years of experience in software engineering, I specialize in delivering cutting-edge cloud and storage solutions. Currently, as a Software Principal Engineer at Dell Technologies, I contribute to the development of Security for Dell Private Cloud Products in collaboration with global teams across the US and China. My work focuses on E2E planning of product releases, driving design discussions with cross-functional teams, and development. I take pride in driving technical discussions, investigating complex issues, and collaborating on innovative solutions such as the design and development of system management middleware and shared intellectual property for Dell's storage products.

Experience

Software Principal Engineer — Dell Technologies

Jul 2024 – Present

Bengaluru, Karnataka, India · Hybrid

- Applied an autonomous AI agent (Devin, Claude Opus 4.8) to a VCF deployment failure open for over two weeks, reaching root cause by scanning system logs against technical documentation and KBAs.
- Prototyped a local LLM as an LLM-as-a-Judge for QE validation of 10-15 STIG rules in a hackathon proof of concept.
- Architected the DPC-V Outcome Manager Compliance Engine — first production release, covering over 90% of applicable STIG rules across VxRail, VCF and DPC-V, validated on 20 virtual clusters.
- Automated 95% of compliance scanning and remediation, replacing a monolithic codebase that was difficult to maintain.
- Led 4-12 engineers across two years of Dell Private Cloud security compliance delivery, shipping 300-400 STIG rules.
- Identified and fixed 50% more defects before GA than the previous release, personally fixing 40% of all defects in the stream.

Software Principal Engineer — Dell Technologies

Feb 2023 – Jul 2024

Bengaluru, Karnataka, India · Hybrid

- Delivered 20+ features across VCF on VxRail in six months, at 96% GA readiness.
- VCF on VxRails API Testing Framework.
- Drove VxRail and VCF (VMWare Cloud Foundation) - This is a joint collaboration between Dell (EMC) and VMWare.
- Release Planning and Management for VoV (VCF on VxRails).

Manager 2 — Dell Technologies

Nov 2021 – Jan 2023

Bengaluru, Karnataka, India · On-site

- Mentored 7 engineers — coaching through technical and personal challenges; scored 100% on Tell Dell, Dell's team-rated leadership survey.
- Led 7 engineers across the PowerMax File product team.

Software Principle Engineer — Dell Technologies

Dec 2019 – Nov 2021

Bengaluru, Karnataka, India · On-site

- Architected enterprise-grade system management middleware from scratch — PowerMax File 2G, released to the field and reused as shared IP across Dell storage products.
- Improved PowerMax File system-management middleware performance by 10x.

Alumni Representative CSE Board of Studies — PVP Siddhartha Institute of Technology

Oct 2019 – Present

Vijayawada, Andhra Pradesh, India · Remote

Software Senior Engineer — Dell EMC

Apr 2013 – Oct 2019

Bengaluru, Karnataka, India · On-site

- Architected the Embedded NAS VDM Sync disaster-recovery feature over SRDF — delivered to VMAX enterprise customers at 98% GA readiness.
- Embedded NAS - VDM Sync Technical lead.

Software Engineer — Dell EMC

Jul 2012 – Apr 2013

- Design and development of NAS features in Eiffel, Java, Perl. Release Engineering tasks in startup mode.
- A world leader in SAN, NAS and Virtualization technologies; Worked on VNX and VMAX products.

Project Engineer — Wipro Technologies

Jun 2007 – Jul 2010

- CAD - Cisco Agent Desktop : Maintenance, Development, Testing and Customer Support.
